DESCRIPTION:

The Model 2700 4 Inch All Weather Rain Gauge meets National Weather Service specifications. Made of clear polycarbonate injected into a mold, the Model 2700 consists of four pieces, the top funnel, the inside measuring tube, the outer cylinder, and the mounting bracket.

The inner clear measuring tube will hold up to one inch of water and is graduated in 0.01 inch (0.0254 cm) increments. If more than an inch of precipitation falls, then it overflows into the larger four-inch polycarbonate collection cylinder for a total collection of eleven inches of precipitation.

The 2700 slides on and off a sturdy mounting bracket for easy measuring and remounting. It should be mounted on a 4 x 4 in (10.2 x 10.2 cm) pole or two 2 x 4 in (5.1 x 10.2 cm) nailed together and installed in an open space away from trees, buildings, or other obstructions that would affect the collection of precipitation.

SPECIFICATIONS:

Graduation	0.01 inch increments
Capacity	1 inch (2.5 cm) inner cylinder, 11 inches (28 cm) total
Material	Clear polycarbonate
Dimensions	14 x 4.4 in (35.6 x 11.1 cm) (H x Dia.)
Weight	1.8 lbs (0.8 kg)
Shipping Weight	2 lbs (0.9 kg)

ORDERING GUIDE:
