Model 5950-02

## DESCRIPTION:

The 5940 Series Telemetry Cabinet is based on years of field experience and the feedback of our ALERT/ALERT2 field technicians and customers. The cabinet is weatherproof and offers users the ability to house most any style of transmitter, whether it's a canister or NEMA enclosure.

The 5950 Series of Telemetry Cabinets includes durable welded construction for antenna mast, mast cover, and cabinet. Gasket retainer, stainless steel door hinges, sealed joints, and door position rod allows for maximum durability and security from weather and physical intrusions.

Options include wood or metal pole mounting hardware, a standpipe adapter flange for mounting the cabinet on an existing standpipe, and a rear cabinet cover-plate. An interior door bracket assembly can be added as a mounting option for a desiccant or signal conditioning box.

*Optional Model 5950-11  
Interior Door Bracket*

## SPECIFICATIONS:

|                           |   |
|---------------------------|---|
