DESCRIPTION

High Sierra Electronics, Inc. offers a biannual site inspection and maintenance agreement. If this agreement doesn't meet your needs a periodic maintenance agreement is available were the agreement is based on how often you would like a HSE certified technician to visit your sites. All site visits will be scheduled through the Project Management team after communication with site owner. HSE Certified Technician(s) will clean, test and inspect all aspects of the equipment including:

- Power (charging sources and batteries).
- Communication (radios, modems, antennas, feed-line).
- Public Warning Devices (flashing signs, beacons, gates).
- Sensors (rain gauge, pressure transducers, radar, wind and surface, etc).
- Take a current image of the site.
- Take screen shots as well as record test values for each component.
- Technician prepares and submits to client a summary document and detailed report including recommendations for any repairs.

Biannual Field Maintenance Preventative maintenance visits twice a year to ensure your system(s) are operating within factory specifications.

Periodic Field Maintenance Periodic preventive maintenance visits throughout the year to ensure your site is operating within factory specifications.

Training Maintenance On-site maintenance training by a HSE instructor concurrent with field installation of product. Technicians(s) will train representative to fully test system and demonstrate how to determine components that may need repaired or replaced.
