DESCRIPTION

It is High Sierra Electronics, Inc.'s goal to help our customers in anyway possible. Whether you are in need of complete installation or just installation assistance, HSE can provide the help you need. Note: HSE recommends that prior to a radio system installation, a radio path study and radio path test. Contact our Project Manager for more details.

HSE offers several site completion services including managing the entire project with a dedicated Product Manager who will interface with your representative and other contractors that may be involved. FCC License Assistance Service is available as well.

Project Management Dedicated Project Manager at HSE to serve as primary interface with owner's representative in all matters pertaining to execution of the project.

Installation, HSE Turn-Key Installation Provided by HSE. Note: Installation Service by a Certified HSE Technician includes the digging and pouring of appropriate footings, erecting public warning devices such as beacons and/or gates, installation of all gauge components (power, communication, sensor, conduit, warning), complete system test with confirmation of data and alarm data transmission if applicable. The completion of commissioning signifies the start of the warranty period.

Installation, Subcontractor Installation Service by an authorized subcontractor includes, digging and pouring of appropriate footings erecting public warning devices such as beacons and/or gates, installation of all gauge components (power, communication, sensor, conduit, warning), complete system test with confirmation of data and alarm data transmission if applicable.

Installation, RWIS Turn-up System turn-up assistance by HSE Field Technician, which includes wiring termination assistance and system turn-up and operational verification, including support to establish interrogation from provider.

Installation Assistance On-site system installation assistance by a HSE technician in accordance with attached scope of work.

FCC Licensing Assistance Includes completion of application forms, and submission of all required documentation. Contact Project Management for more details.
